According to the plot we can say that for most categories the average pledged amount neither reach nor exceed the average goal. This outcome implies crowd funding for many categories didn't go well which results more failures in the status column.

Data	Encoding
Number of projects	Position
Status	Colour
Year	Position

We can see that the number of projects is showing a skewed distribution over years. The increase in the successful projects is lesser than the increase in the failed projects. And we can see that most of the projects failed to meet their goal amount.
